

Stencil set with letters A-Z+& and 40 mm character height (27 parts)

20139220

Stencil is the ideal tool for all color marking. The possible uses range widely. It could, for example, be marking of storage and transport packaging, tools and containers, buildings and parking spaces.

On the individual stencils there are notches, which are also the lowest point in the sign. The notches make it easy to set them centered on a predetermined line, adhesive strip or other.

The stencil templates can be either brush, roller or spray painted. If they are cleaned after use, they can be reused many times.

- Typography according to DIN 1451
